

## Bloody Rubynts (BR) Before & After – Project Progress Summary

### BEFORE – Project Start

Bloody Rubynts (BR) started as a concept focused on transparency and community value on Polygon.  
No smart contract, no liquidity, no website, no holders.

### DURING – Building Phase (Days 1–13)

- ERC-20 smart contract deployed and verified on PolygonScan
- Initial liquidity added on QuickSwap
- Website and documentation published
- Community education and test swaps performed
- CoinGecko and CoinMarketCap applications submitted

### AFTER – Current State

Bloody Rubynts (BR) is now a live ERC-20 token with active liquidity, real holders, public documentation and visible on-chain activity.
