Bloody Rubynts (BR) – Whitepaper (EN)

1. Introduction
Bloody Rubynts (BR) is an ERC-20 token deployed on the Polygon network.
The project focuses on transparency, simplicity, and community-driven value creation.

2. Vision
The vision of Bloody Rubynts is to provide an accessible entry point into decentralized finance,
while maintaining clear on-chain transparency and realistic expectations.

3. Technology
• Network: Polygon (Proof of Stake)
• Token Standard: ERC-20
• Smart Contract: Verified on Polygonscan

4. Token Utility
BR is designed to be used within decentralized exchanges, community initiatives,
and future utility expansions as the ecosystem grows.

5. Liquidity
Liquidity is provided on decentralized exchanges (DEX) such as QuickSwap.
All liquidity activity is visible and verifiable on-chain.

6. Transparency
All transactions, holders, and token movements can be verified using Polygonscan.
The project does not promise financial returns or guaranteed profits.

7. Roadmap Overview
• Phase 1: Token deployment, liquidity, website, documentation
• Phase 2: Community growth and visibility
• Phase 3: Utility exploration and partnerships

8. Risk Disclaimer
Cryptocurrencies involve risk. This document is for informational purposes only
and does not constitute financial or investment advice.
